### Accumulated Provision for Depreciation and Amortization of Utility Plant on Contributed Plant in Servic

#### General footnotes

The estimated accumulated depreciation on contributed plant in service at 1/1/03 was determined in accordance with guidance provided in Appendix C of Docket 05-US-105 (Credit was estimated by multiplying a ratio times the historical CIAC balance. The ratio was determined by dividing the total accumulated provision for depreciation by the total of all depreciable plant).

4. The utility plant balance first of year should include the gross book values of plant in service (total of utility financed and contributed plant), property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.
